

Colorful Light Ball

Marine solar ball

Marine solar ball is a unique design for marine application. Especially for fishery. Waterproof structure make it is available as lighting of fishnet or bait that can float on water ,the integrated solar module converts sunlight into electrical current in daytime automatically, No need to wire to city power is another advantage of applying on board.

Colorful Light Ball

Features

1. Waterproof structure
2. Solar power charging, no need of wire

Add excitement to your Garden, Pools, Ponds and Parties.

A ball that glows forever
Bringing light and color together Stores solar energy by day .
For lawns, pool, parties and play

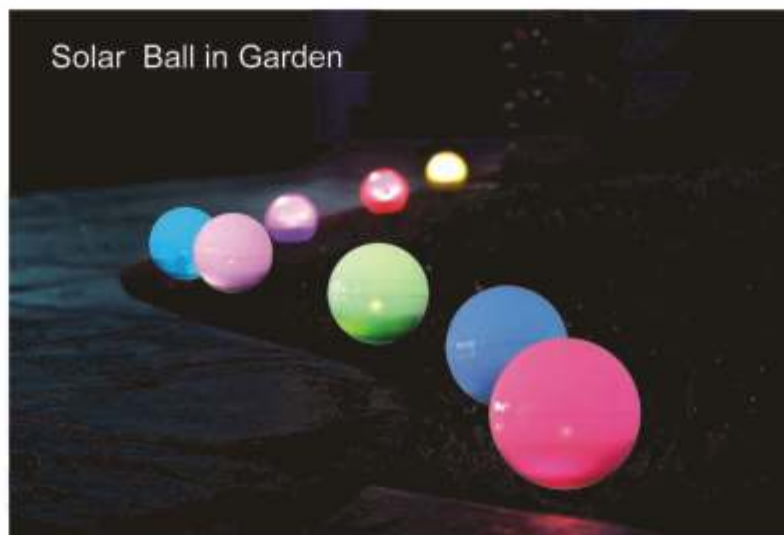

Function

- Applied in your garden as common solar garden light with a stake
- Amazing multicolor solar ball as toy
- Applied indoors as decoration after absorb sunlight in veranda

Specification

Item	Spec
Solar cell	Vpm 3.8V
	Ipm 100mA
	Pmax 0.4W
Lighting	Lighting LED
	Type R G B (1PCS) /Yellow Color Full Color cyclically /Single color blinking
Battery	Voltage 1.2V x 2
	Capacity 1200mAH
	Type NiMH (replaceable)
Operating time	More than 10 hours
Charging time	No less than 3 hours (sunlight intensity 1000W/m ²)
Diameter/weight	130mm / 420g

Safety Instructions

Your warranty claim will lapse for any damage caused through the non-observance of these instructions for use. We shall accept no liability for whatsoever for any follow-up damage.
